Dear Adam,

Many thanks for your email and for attending last week's meeting.

In terms of your appointment this will be shortly (this evening) confirmed by Andy Lyne but my understanding is that insurers have agreed to your appointment as our independent expert. Invoices in accordance with the agreement with Insurers should I believe should be addressed to the policy holder which is Louisa Scarr, 1 Riverside Cottages, The Dean, Alresford S024 9BE and we will recover the amounts from insurers. Andy, if you could clearly spell out what has been agreed I would appreciate it.

In terms of our objective it is simply with your help to be able to get insurers to agree that the waterproofing as outlined in the Maclennans quote is an essential part of reinstatement and not betterment. Further to this, we would be very grateful for your advice on assistance on any variances that should be made to the Maclennans quote to better facilitate the objectives.

Outside of this immediate brief we will be taking action against Southern Water to recover our uninsured losses. I would imagine insurers will also want to subrogate against Southern Water to recover those losses. I see this as very much a second step outside of this agreement but one that we will need to consider soon.

As regards Bio response they have attended our property multiple times. The first one within a week of the incident to do a surface clean but it was very superficial in nature as that was the only brief they had from insurers at that time. They reported back to insurers that expeditious action would need to be taken otherwise there would be very significant secondary damage. Alas as insurers did nothing this is the position today!

Pursuant to the first visit they attended a number of times subsequently, but the only drying that was done was post the strip out carried out during the week of the 9th June. Bio Responses failure to come with any antimicrobial chemicals the week after the stirp out further delayed the

drying out process. The strip out was eventually carried out in two parts as Bio Response recognised that further work was required weeks after the original strip out. I am attaching pictures of the same at the time of both stirip outs. I also attach some moisture reading taken on the 6th June.

Southern Water installed a Non return valve I believe circa 25 years to protect our drains. Although they said their video evidence showed everything was fine, our own independent video evidence taken by the Pest control company showed that the Valve could not have possibly worked as the manhole was silted it up. The Pest control company were required because we had a mass infestation of rats attracted by the sewage that went throughout all three properties.

I am attaching a position paper that I have prepared on why Waterproofing is an essential part of reinstatement and not betterment. This should be read in conjunction with the email I sent last week appending the quote and another brief paper.

I am also going to forward you two recent emails as they are relevant to the claim concerning Louisa's vulnerabilities and also sewage contamination generally.

I am very pleased to have you working alongside us Adam. A claim of this nature clearly needs your expertise and I was pleased that this was acknowledged by insurer's own surveyor when we met.

With Kind regards,

Nicholas
