Subject: Waterproofing and Reinstatement update and proposal to be read in conjunction with attached PDF.

Simon,

Following our conversation yesterday, I reviewed the quotes and invoices in detail and wanted to update you formally. *I have attached a PDF setting out the changes* and, for ease of reference, I have also attached the relevant quotes.

During my review, I identified an error which results in a reduction of *£1,650* to the underwriter's cost, arising from the specification of quartz rather than wood in the kitchen. I had previously understood that the smaller workspace area would result in a lower cost; this has not proved to be the case, and I apologise for the error.

Turning to the proposal itself, and quoting figures *prior to this adjustment*, the total claims basket being submitted to underwriters is *£154,813.54*. We are proposing to make *concessions and contributions*, which I set out below. For clarity, the presentation therefore separates the figures into two baskets:

-

Basket A – Insurer's responsibility

-

Basket B – Policyholder's responsibility

The detailed breakdown of the claim is set out on *slide 5*.

The remaining area of contention is the *backup sump pumps*. As discussed, I consider these to be critical elements of the scheme. The total cost of the sump pumps and associated control units is approximately *£12,000 plus VAT*, with the redundant (backup) pumps representing *£6,000 plus VAT*. Without wishing to rehearse all the points previously covered, the reality is that pumps do fail, and bitter experience has taught the industry that backup pumps are absolutely essential rather than an added luxury.

Clearly, we are keen to arrive at an agreed and consensual position, and I have therefore given careful consideration to what further steps we can reasonably take. On that basis, I am proposing the following cost

reductions and contributions in the hope that we can reach a consensual position without further delay.

In terms of agreed claim reductions *(inclusive of VAT)*:

-

Silks quote QU2730 is being reduced by *£7,195* (rear drainage).

-

Under the reinstatement quote *QSU2721*, we are reducing *£1,380* (front defence door).

Slide 7 addresses the kitchen; please bear in mind that the figure shown will be reduced by *£1,650*, reflecting the policyholder contribution in respect of the quartz specification.

Slides 9–11 deal with items that are not being pursued, including:

-

the two sump pump chambers have already been paid for, and reimbursement will not be requested; and

-

the *flood defence door*.

For the avoidance of doubt, the *final cost position* is as follows:

-

the *final cost, including VAT, under Basket A*, which we are asking underwriters to register, is *£153,200*, net of the *£1,650 reduction* previously referred to; and

-

the *amount we are proposing to concede or contribute* is *£15,175*, *excluding* the *£1,650* policyholder contribution in respect of the kitchen.

Please do give me a call if you have any queries. I am very happy to clarify anything or to take advice on any feedback you may have.

The concessions proposed are made *on a without prejudice basis*, in the hope that we can bring this matter to a conclusion. I genuinely hope we are not going to continue going around in circles on the sump pumps. As mentioned yesterday, our scope for further assistance is increasingly constrained by the additional professional fees being incurred, which we hope to recover from Southern Water in due course, albeit over a lengthy

timeframe.

Kind regards,

Nicholas
