Dear Andy,

Please see below the email from Darren George, our pest control contractor, together with the attached invoice for his work.

As you will note, Darren confirms this was one of the worst rat infestations he has encountered, directly arising from a sewer defect that allowed foul water and rats to enter our property.

The rat problem was greatly exasperated by the insurers' failure to react quickly to this incident. This delay allowed the situation to escalate dramatically, with sewage attracting rats in la numbers and creating massive problems for us. The stench in the house became unbearable, adding to the distress we were already experiencing.

Our highly disabled neighbour, Frances, who suffers from epilepsy and physical disabilities, was particularly affected. Fourteen rats were taken from her kitchen, and she even experienc rats jumping out of cupboards — an appalling and traumatic situation.

This was a shocking experience, one that I hope we never have to endure again. Darren's evidence makes clear the scale of the problem and the serious impact it has had on us and ou neighbours.

Best regards,

Nicholas

Subject: Rat infestation in your home

Good morning Nicholas,

I was called to your property on 12 March 2025 following your concerns of a rat problem following the ingress of raw sewage into your home from a suspected defect in the public sewer. Following my initial survey and subsequent visits I confirmed the defect was within Southern Water's ratable asset and provided you with the required evidence. Since the initial visit, the rat problem escalated very quickly into an infestation, the rats bred rapidly and spread from your home into the adjoining two properties. I was unable to contain the infestation until such time that Southern Water accepted their responsibility to fix the defect which was allowing rats out of the public sewer and into your home. As an example of how the fast the problem escalated, fourteen rats were caught in the kitchen of your disabled neighbour's home. I have been in the pest control industry for fifteen years and this is one of the worst cases of a rat infestation following a defect in a foul water system.

I am now confident I have resolved the problem, however, should you have any concerns please do not hesitate to contact me.

Kind regards

Daren George – RSPH Level 2 Award in Pest Management
