■Hi Adam,

Many thanks for your email.

I will look into this and respond prior to your return.

I am grateful to you for confirming that you will be able to get a report out next week.

Kind regards.

Nicholas

Dear Nicholas

Thank you for your emails and attached useful information; I have reviewed this together with the information received from Andy Lyne
(copied).

Unfortunately, due to my workload this week I do not have the time needed to prepare my report before going on leave now until Sunday
26 October.

I am sorry not to be able to provide this for you as I understand and appreciate that the matter has been subject to various delays to
date.

In the interim, I comment as follows:

I have the first FOS case you refer to but could not locate the 2nd one on the FOS site (DRN-2833833); please could you provide me with a copy.

I have attached details of another case related to flooding that may be helpful (DRN – 2011759)

Your property has high ground levels (higher than the internal GF level) at around 1m on either side; it is not clear how ground moisture was prevented from reaching the
interior before the incident. Any information would be helpful.

There were visible wet areas evident to the floor slab edges and at joints between sections of the slab at the time of our last meeting; this indicates that moisture ingress
occurs even during a prolonged dry period.

Given the risks for Louisa as outlined by the health experts, can I suggest that you ask MacLennan to quote for a gas resistant (‘GR’) installation. I am not sure what
system they may offer, but I have attached details of products (3 documents) available from John Newton & Co that protect against methane, CO2 and radon. This will require sealing of a cavity drainage

membrane installation to a higher standard than for just
moisture.

The UKHSA Mycology Reference Laboratory at Bristol -

https://www.gov.uk/government/collections/mycology-reference-laboratory-mrl – may be able to advise and assist with testing before and after any applied cleaning/disinfectant treatment. There are downloads to be found at the link provided.

Please can you list my precise instructions so that I know the points you need me to include within my report; I will of course let you
know if I consider any of these to be outside of my expertise.

Subject to the above, I undertake to provide my report during w/c 27 October after my return from leave.

Kind regards

Adam

Dear Adam,

This is the final email I am sending (see below) regarding Louisa's vulnerabilities and insurers lack of action. As you will see Dr Vanya Gant has made clear the house needs to be returned to hospital sterilisation standards.

With Kind Regards,

Nicholas

Subject: Breach of FCA rules and guidance

To: Andy Lyne <Andy.Lyne@qlaims.com>

Cc: Claims <Claims@qlaims.com>

Dear Andy,

I attach for the file a letter from Dr. Dodd, Louisa's GP, confirming that she has a long-standing history of bipolar disorder and depression. She makes it clear that the ongoing stress and uncertainty surrounding this claim are putting Louisa at real risk of relapse. This places Louisa in the category of being mentally extremely vulnerable.

This evidence sits alongside the earlier letter from Dr. Vanya Gant (also attached), Consultant Microbiologist, who stated in clear terms that Louisa is physically very vulnerable as a result of being immune-compromised. Taken together, these two medical reports establish beyond question that Louisa falls within the extremely vulnerable category.

The insurers were already aware that Louisa had been signed off work for stress at the very outset of this claim. Their conduct in handling matters over the past seven months has done nothing but escalate significantly the stress upon her. This is plainly in breach of the FCA's rules and guidance regarding the treatment of vulnerable customers, and it also runs contrary to the FCA's Consumer Duty, which requires firms to act to deliver good outcomes for customers, with particular regard to those in vulnerable circumstances.

I want this point made very clear to insurers: Louisa is in the extreme vulnerability category — on both mental and physical grounds — and they must now act accordingly. If there is no immediate and meaningful progress, I will have no option but to escalate this as a formal complaint under the FCA regime.

Please ensure that both Dr. Dodd's and Dr. Gant's letters are placed firmly on record and drawn directly to the insurer's attention without delay.

Nicholas
